SUMMARY

Dynamic Fullstack Developer with 2 years of experience in designing and implementing robust APIs and web applications. Developed a RESTful API for an eCommerce platform, enhancing data integration and user experience, and engineered a GraphQL API to automate content management, boosting operational efficiency. Seeking to contribute to innovative development projects by leveraging expertise in NextJS, NestJS, and database management.

EXPERIENCE

Fullstack Developer
Techwiz   **February 2023 - Present, Ho Chi Minh, Viet Nam**
· Optimized and built front-end components with NextJS/ReactJS to reduce loading times by 30%, enhancing overall user experience.
· Developed a responsive landing page using modern web technologies, aimed at increasing user engagement and conversion rates.
· Designed and implemented a RESTful APIs for an eCommerce platform, enabling seamless integration between the admin dashboard, website, and mobile application to ensure efficient data management and a smooth user experience.
· Engineered a GraphQL API for a content automation tool, facilitating the automatic distribution of crawled content to configured platforms such as Discord and Telegram, streamlining content management processes.
· Conducted thorough code reviews on ReactJS and NextJS projects bi-weekly to ensure code quality and adherence to industry standards, resulting in a 25% decrease in post-deployment issues.
· Implemented security best practices and mechanisms across all applications, utilizing Node.js and Express to enhance data protection and ensure compliance with industry standards, reducing vulnerability incidents by 15% within six months.

PROJECTS

Automated Content Tool
Techwiz
· Built interactive React components following Figma specs; ensured 100% design fidelity and introduced lazy-loading to improve time-to-first-paint.
· Analyzed project requirements and designed an effective Automated Content Tool using advanced analytical methodologies.
· Optimized content distribution via a GraphQL API, achieving an increase in response efficiency.
· Engineered Telegram and Discord bots, using TypeScript, to automate the collection of user interactions.
· Utilized Jest to conduct thorough testing post-review, ensuring high-quality and performant code deliverables.

Lang Co Thu
Techwiz
· Directed project management efforts, using agile methodologies to enhance team collaboration and project efficiency.
· Implemented structured business analysis methodologies to ensure thorough comprehension of project aims, improving goal alignment efficiency.
· Optimized backend RESTful API, enhancing data retrieval and synchronization between the admin dashboard and the client application.

Clinic Landing Pape
Techwiz
· Enhanced landing page performance by incorporating server-side rendering with NextJS for improved SEO.
· Engineered a responsive landing page using CSS frameworks to ensure adaptive design across all screen sizes.
· Implemented data collection forms to capture user information effectively for backend processing, utilizing ReactJS for a responsive design.

EDUCATION

Bachelor of International Business
University of Economics Ho Chi Minh City · Ho Chi Minh City · 2021 · 3.2

SKILLS

Programming Languages: JavaScript, TypeScript
Frontend Frameworks/Libraries: ReactJS, NextJS
Core Web: HTML5, CSS3/SASS, Responsive Design, Flexbox/Grid
Styling & UX: Tailwind CSS, Styled-Components
Backend Frameworks/Libraries: NestJS, Prisma, Mongoose
Database: SQL - MySQL/PostgreSQL, NoSQL - MongoDB
API Development: RESTful APIs, GraphQL APIs
Version Control: Git
